GREATER AKRON CHAMBER

Admin & MC Trade Guide

Installing and running the scanner, AI double-check, duplicates and exports, the MC Trade import, accounts, settings, privacy, troubleshooting.

Pilot guide · updated Oct 28, 2026 · version 0.4.8

Greater Akron Chamber · business-card scanner pilot · internal use only

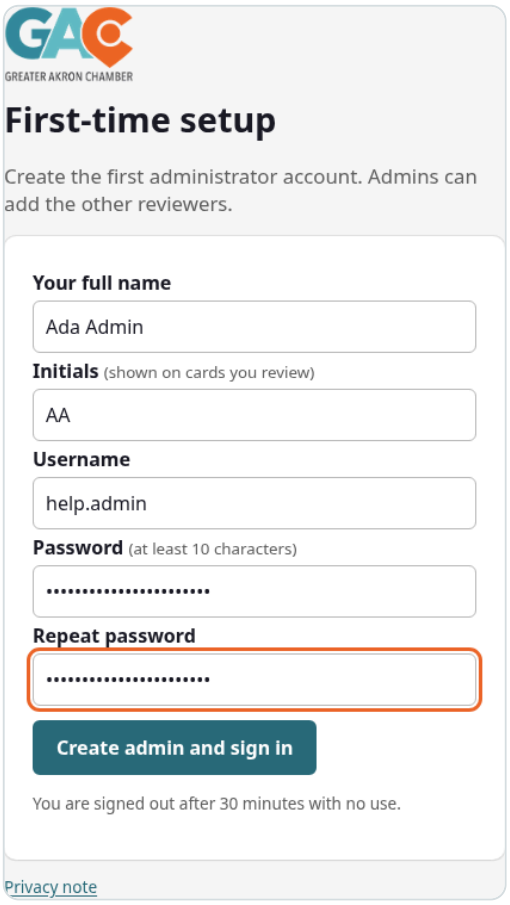

For the person who runs the scanner and does the MC Trade import. Reviewing cards is in the **Reviewer Guide**.

Contents

- 1. Install (once)
- 2. Every day
- 3. Backups
- 4. Who may export
- 5. Export
- 6. MC Trade import: first time
- 7. Settings
- 8. Accounts
- 9. Archive and audit
- 10. Removal requests
- 11. Problems

1. Install (once)

1. Run **GAC-Card-Scanner-Setup.exe** (Windows) or open the **.dmg** (Mac: arm64 for Apple chips, x86_64 for Intel).
2. Open **GAC Card Scanner**. First time: **First-time setup** creates the first admin.
3. **Admin → Reviewers**: add one account per person.

First-time setup works only on the scanner computer.

2. Every day

- Open **GAC Card Scanner**. Keep it open while people work.
- **AI check** (optional): **Admin → Settings → AI helper → Download**, then **Start**. Scanning works without it.
- **Scan with phone**: on **Scan cards**, under **More**. Same office Wi-Fi. The QR link expires after 15 minutes.

3. Backups

- Automatic every night at 02:30. The last 7 are kept, in `backups/`.
- Put them on another disk: start with `GAC_BACKUP_DIR=<folder>`.
- Restore: stop the scanner, run `scripts/restore_backup.sh <file>`, type **YES**.

---

4. Who may export

Who	May export
Reviewer	Approved cards of **their own** batch only
Admin	Any batch, **All batches**, pending or rejected cards too

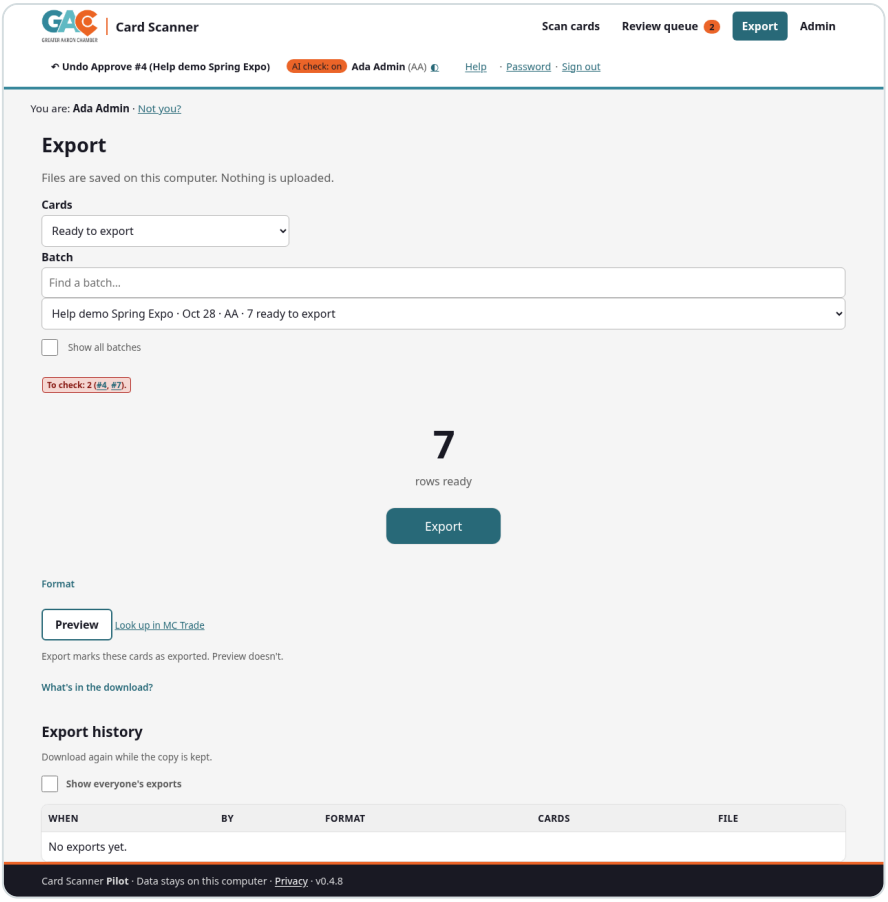

The server enforces this. An admin exporting someone else's batch is asked first; **Cancel** is the default.

Only admins may **Confirm** a blocked field (any field: name, title, company, department, email, website, address). Confirmations made by reviewers before v0.4.5 no longer count; those cards block again until an admin confirms them. Open the card, compare with the photo, click **Confirm** and give a reason. The reason is logged.

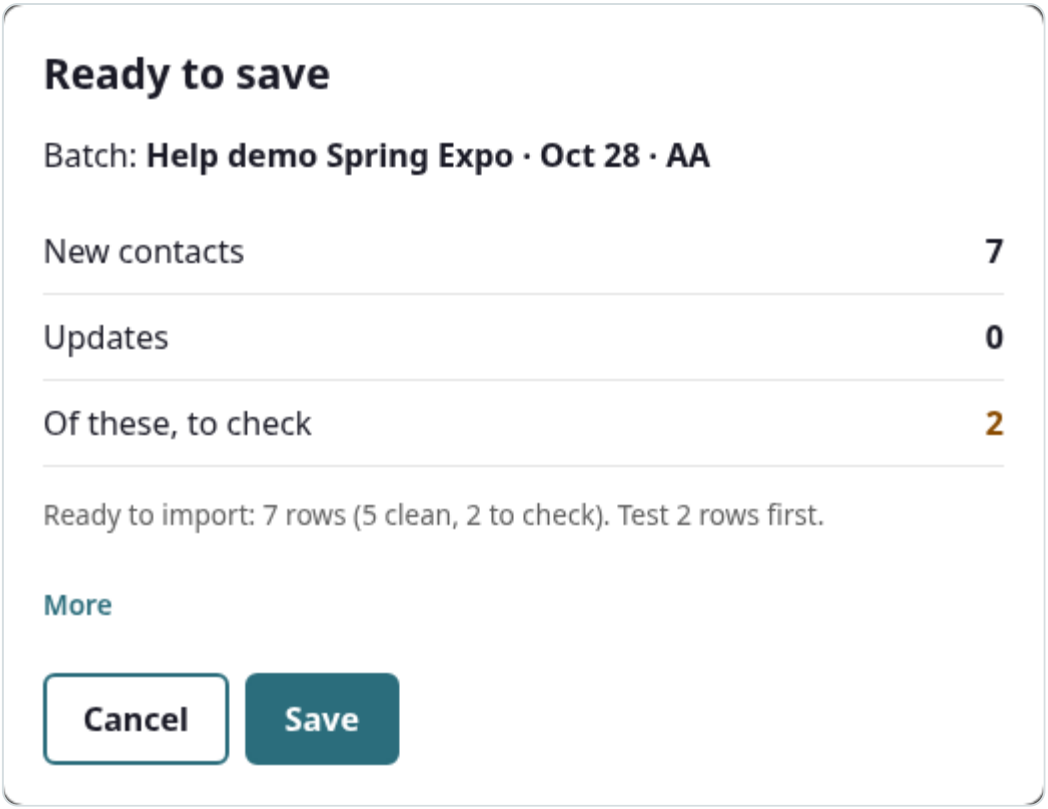

---

5. Export

1. **Export**. Your current batch is chosen.
2. **Preview** shows the rows and what's left out.
3. **Export** → **Ready to save** → **Save**. Other formats are under **Format**.

On the sheet	Means
New contacts	Rows in the import file
Updates	Rows in the UPDATES file
To check	Cards with a **Check** line in the READ-ME

Import only **IMPORT-ME_GAC-MCTrade-…-DATE_TIME.xlsx**. **IMPORT-ME-UPDATES_…** (only when there are updates) is for updating existing contacts, as a separate import. Files named **NOT-FOR-IMPORT_…** (summary, CSV, READ-ME) are for reading. The READ-ME's first line says, for example, **Ready to import: 3 rows (2 clean, 1 to check). Not in the file: 1 edited after export.** Read the **Check** lines first.

After an export the page shows a short checklist: 1. Read the READ-ME. 2. Import only the IMPORT-ME file. 3. Test 2 rows first.

Not in the file:

- **Edited after export:** the card was changed after it went out. It is not in the next file. To send it again, tick **Include anyway** in the Save dialog.
- **Already exported:** the same person (name and company, or email) is in an earlier IMPORT-ME file, so **All approved** leaves them out to avoid a duplicate in MC Trade. **Include anyway** puts them in.
- **Only in an earlier CSV:** the card went out in a contacts CSV but never in an IMPORT-ME file, so it is included as new (the READ-ME says so).
- **Waiting for admin:** cards a reviewer flagged with **Needs admin**.
- **Nothing new to import:** no file is made and nothing is marked exported.

Needs admin: a reviewer can flag a blocked card for you. Turn on **Needs admin** in the Review queue to list them (the menu badge counts them). Confirm or fix the field; the flag clears when nothing is left to confirm. The Export dialog shows how many wait for you, in this batch and in all batches (the link lists them all).

---

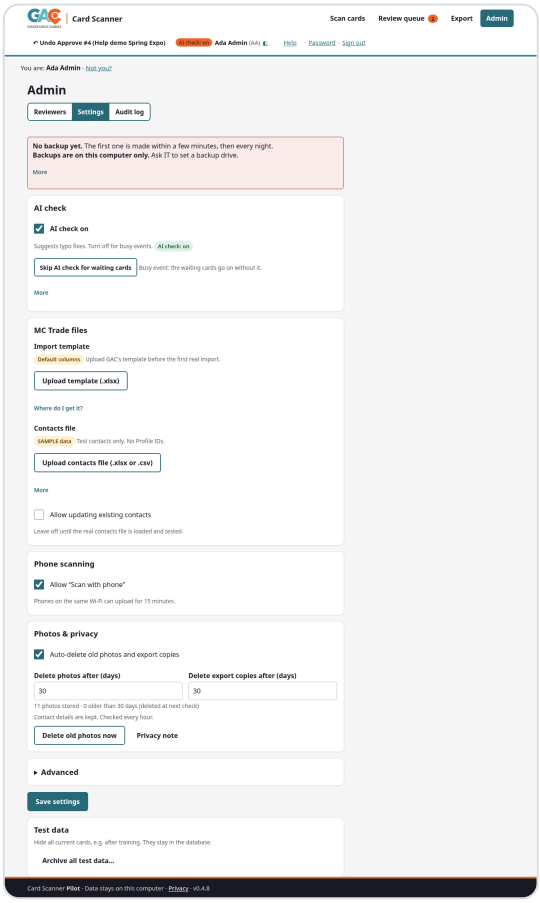

6. MC Trade import: first time

1. MC Trade **Admin → Manage Codes**: create **CardScan-Pilot**.
2. MC Trade **Admin → Import Profiles → Download Template**. Upload it in **Admin → Settings → MC Trade template**.
3. MC Trade **Profile Selector → Export All System Columns**. Upload it in **Admin → Settings → MC Trade contacts**.
4. **Export → Look up in MC Trade** (a dry run). Fix every **FIX FIRST** row. Decide every **NEEDS REVIEW** row.
5. **Test 2 rows first.** An import can't be undone.
6. Import in order: organizations, individuals, then updates (separately).

Nothing is sent to MC Trade by the scanner.

---

7. Settings

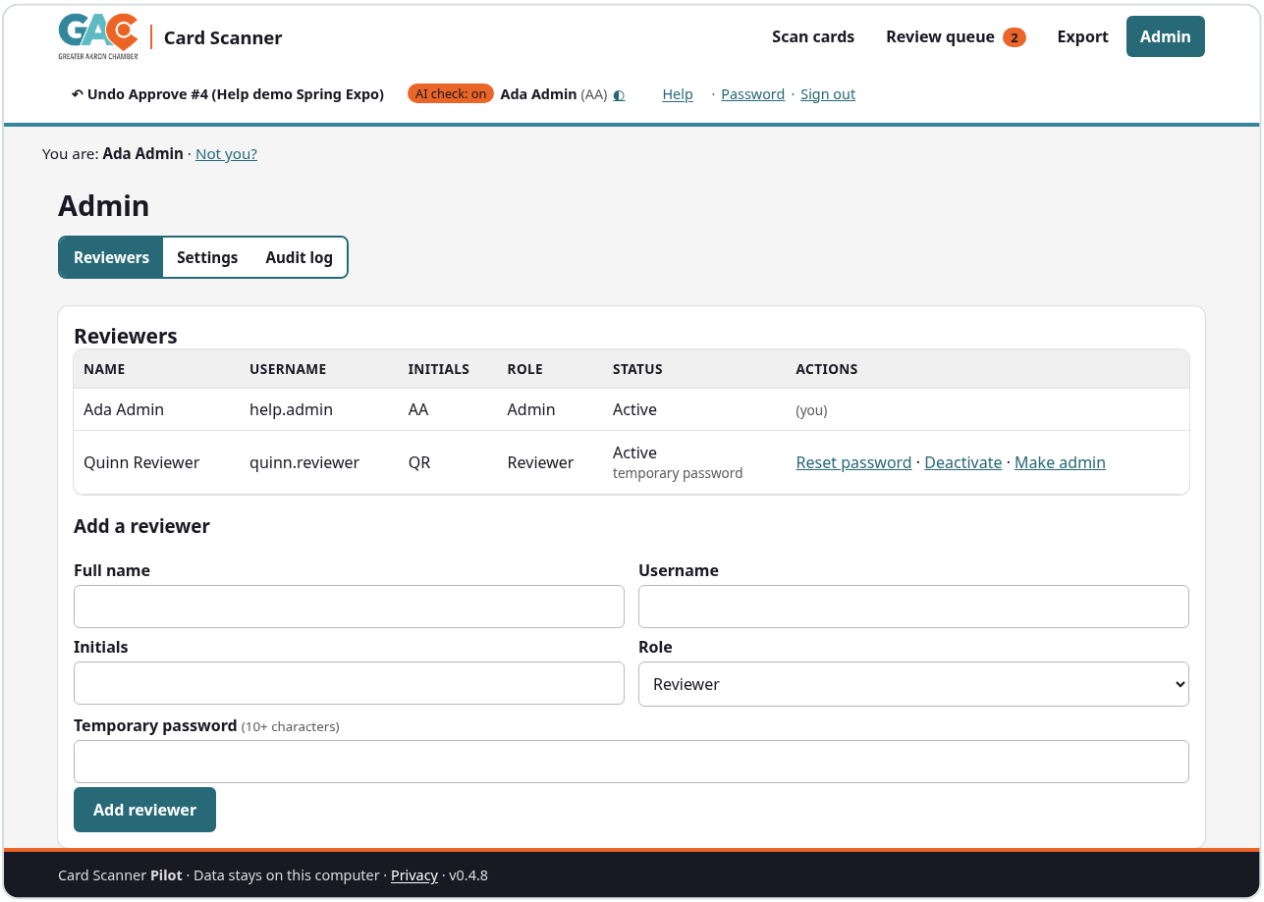

Setting	Default
AI double-check	On when the AI helper runs
Affiliation code (AffCode1)	`CardScan-Pilot`

Setting	Default
Allow "update existing contact"	Off. Turn on after one tested update import.
Phone format	`330-555-0181`
Keep corrected cards as test examples	Off
Delete photos after	30 days (never while pending)
Delete export copies after	30 days

Click **Save settings**.

8. Accounts

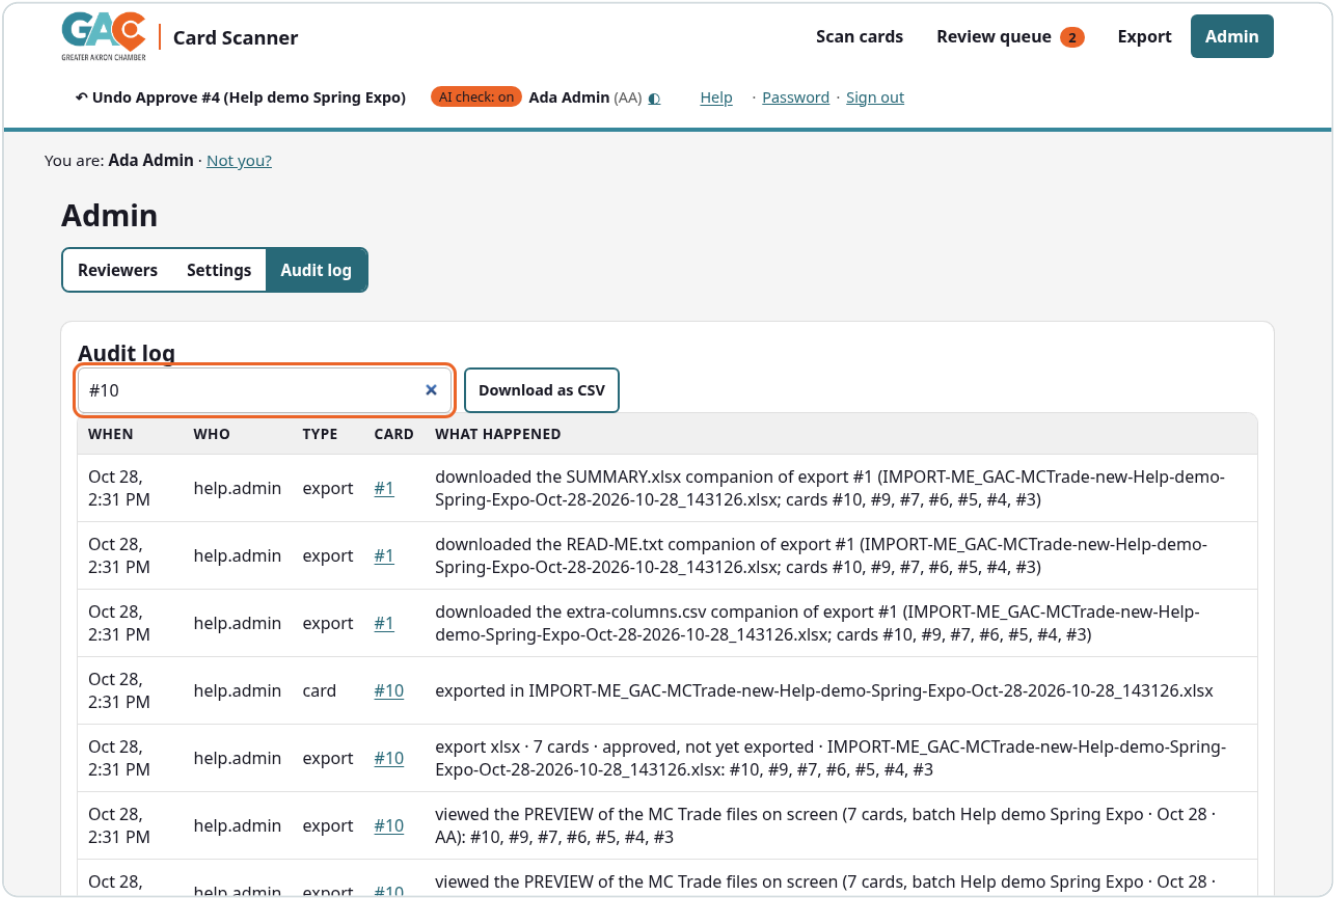

- **Add reviewer**: name, username, initials, role, temporary password (10+ characters).
- **Reset password** also lifts a lock.
- **Deactivate** someone who left. Their history stays.
- Idle sign-out: after 30 minutes with no clicks. Change it with `GAC_IDLE_MINUTES=<minutes>` (0 = off).

Locked out of every admin account: `python -m app.admin reset-password <username>` in the scanner folder.

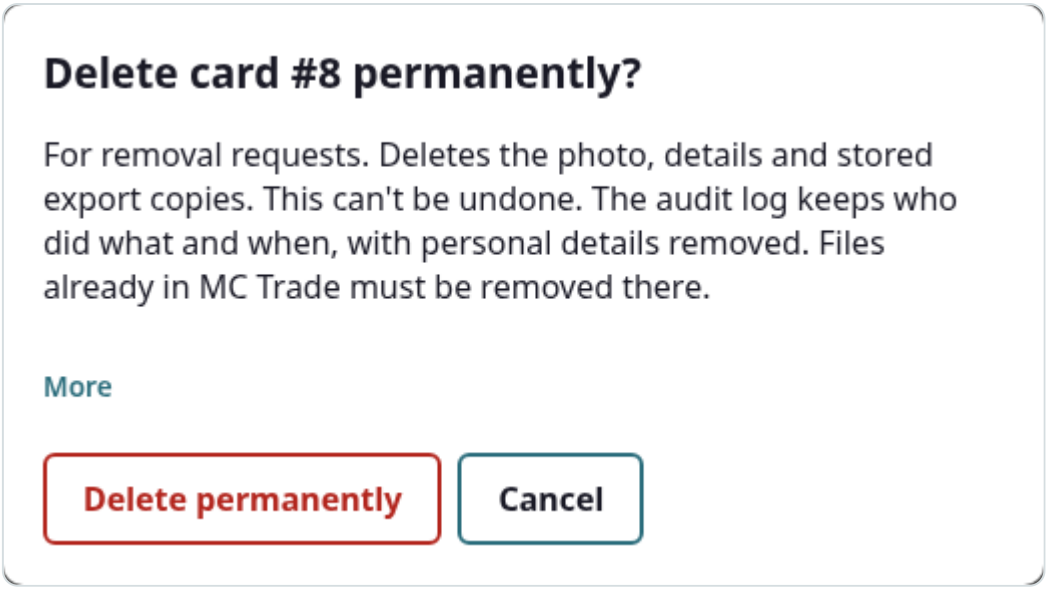

9. Archive and audit

- **Archive batch** (Review queue): hidden, not deleted. **Undo** brings it back.
- **Archive all test data** (Settings): type **CLEAR**.
- **Admin → Audit log**: who did what, when. **Download as CSV**.

10. Removal requests

1. **Review queue → All**: search the name or email. Open the card.
2. **More → Delete… → Delete permanently**. It can't be undone.
3. Repeat for any other card of that person.
4. Remove them from MC Trade too, and delete exported files that hold them.

11. Problems

GAC admin contact: _____ (name, phone or email). Write it into the Reviewer Guide too.

Problem	Do this
"AI check is off"	Scanning still works. **Settings → AI helper → Start**.
Export **blocked**	Open the listed cards. Answer **Same** or **Different**.
"Something changed" on Save	Someone edited a card. Check, then save again.
Phone can't connect	Same Wi-Fi. Allow **Private networks** in the firewall.
Sign-in locked	**Admin → Reviewers → Reset password**.
